Education

Indian Institute of Information Technology

Bachelor of Engineering in Computer Science

August 2022 – July 2026

Kota, Rajasthan

Swami Vivekananda Government Model School

Class XII CBSE (Science Stream)

March 2021 – July 2022

Reoder, Rajasthan

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Software Engineering
- Computer Networks
- Database Management
- Artificial Intelligence
- Operating Systems
- Cloud Computing

Experience

CRICKBUG PRIVATE LTD

June 2025 – July 2025

FullStack Developer

Remote

- **Developed and deployed 6+ full-stack features** using **React, Node.js, Express, and MongoDB** improving overall app performance by **28%** through optimized API design and state management.
- **Built 3 reusable UI components** and **integrated 5 REST APIs**, reducing frontend development time by **35%** and **improving code reusability**.
- Implemented **user authentication (JWT + bcrypt)** and reduced login response time from **450ms to 180ms** by optimizing **backend routes and database queries**.
- Improved overall website performance by **35%** by **optimizing frontend components, reducing unnecessary re-renders, and cleaning unused code** for faster load times.

Projects

Neurica | MERN Stack, JWT Authentication, Razorpay, Tailwind CSS 🚀

- Engineered a comprehensive healthcare appointment platform, streamlining **patient-doctor interactions by 40%** through a responsive and scalable **MERN Stack** architecture.
- Integrated a secure payment gateway, reducing **booking drop-offs by 25%** through seamless and reliable transaction processing with the **Razorpay API**.
- Optimized clinic operational workflows by **over 60%** by implementing a dynamic **Admin and Doctor Dashboard** for real-time appointment management and profile verification.

StockFlow | MySQL Workbench, SQL (Joins, Aggregations), Python, Jupyter Notebook 📊

- Engineered relational schema linking **products, warehouses, and orders**, enabling normalized storage and eliminating **100% redundant data** across **6 interconnected tables**.
- Automated inventory tracking system processing **1,000+ orders** across 101 warehouses, reducing manual stock monitoring efforts by **35%** and **preventing stockouts**.
- Generated real-time inventory insights from **1,001 stock records**, improving decision-making **speed by 40%** for order fulfillment and reorder management.

RythmAI | Machine Learning, Feature Engineering, PCA, Data Preprocessing, EDA, Model Evaluation 🧠

- Developed **cardiac arrhythmia classifier** using Python and scikit-learn, **predicting 16 disease** types from **279 clinical features** with optimized accuracy.
- Implemented **PCA and SMOTE techniques** to handle high-dimensional medical data and severe class imbalance across **452 patient records**.
- Built end-to-end ML pipeline evaluating 7 algorithms, including **Random Forest, SVM, and XGBoost** with **cross-validation and hyperparameter tuning**.

Technical Skills

Languages: Python, C, C++, JavaScript, SQL

Developer Tools: VS Code, Git/Github, Linux

Technologies/Frameworks: React, Node.js, Express.js, Streamlit

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Leadership / Extracurricular

ReImagine By Sheryians

June 2024

Team Leader

Bhopal, India

- Built and improved the pTron website, focusing on enhanced user experience and interface design.
- Utilized HTML, CSS, and JavaScript to create a responsive and visually appealing layout.
- Successfully collaborated with team members to implement innovative features and meet project goals.
